

Combine the highest printing speed and superior quality in 600 x 600dpi and higher with these precise, accurate printers

Created by a name recognised in the marketplace for exceptional quality, these large-format photo printers combine high productivity, superior quality and ease of use into one complete package. Designed for photo labs, high street photo and copy shops and corporates looking for an in-house solution, the SC-P20000 can create a range of high-quality photos, POS and signage

#### **High productivity without compromising on quality**

Allowing users to benefit from high productivity without compromising on quality, the printer comes with a PrecisionCore MicroTFP printhead for producing outstanding results, even in lower-quality modes. Coupled with a high-precision media feed technology, including a newly developed camera-based paper feed stabiliser and media inductive roller system, the printer helps ensure smooth operation.

#### **Accurate, precise and reliable results**

A new Epson UltraChrome Pro 10-colour ink-set consistently delivers fantastic-looking prints. Blacks will be deep and rich thanks to new high-density Photo and Matte Black inks. Better gradation with reduced graininess is achieved thanks to K4 and Multi Size Droplet Technology (MSDT). To ensure consistency without the need for expensive add-ons, Epson Colour Calibration utility means users can easily manage their colour reproduction.

#### **Easy to operate and maintain**

Getting started is easy with a clearly illustrated user guide and colour LCD Panel. When it comes to handling, changing and switching media the process is quick and effortless. During printing, a transparent printer cover window and roll cover window allow users to check the print status and remaining media. After printing has finished, the position of the printhead means it can be cleaned by the user, along with the ink cap, to help save on maintenance costs.
